Lab Sheeting Roll & Moulder

Moulder

Three teflon coated aluminum rollers turn at 90rpm.
Gentle, effective action...no abuse of dough
Ends. Top roller is hinged for convenience.
Predetermined pressure easily maintained.
Easily accommodates all sizes of loaves.

Sheeting Roll

Teflon-coated aluminum roller reduces adhesion.
Sheeted dough quickly removed. Minimal
Dusting flour required to speed molding.
Sheets in 6-inch width for pound loaves.
Adjustable to sheet pups.

Electrical Requirements

110-120V, 50Hz or 60Hz, AC.

Convenient Foot Switch Included
