Lincoln, Nebr.

Micro Mixer

for "Micro" Doughs and Absorptions

The National Micro-Mixer was developed in response to the call for a "small" plain mixer using the Swanson Type Mixing Head; one in which the mixing action can be readily observed as well as being thorough and fast. Widely used for absorptions and by those few Labs. that carry on some "micro" work.

Mixing head is identical to the mixing head of the Mixograph.

Available in the following sizes:

- 10 Gram
- 35 Gram
- 100 Gram
